Subject: RE: Border 2020 grant

Hi Christine,

I am actually putting together a list of border region grant funding proposals for my management now. I know Sylvia Vanderspek plans to send these ideas (and others to Amy). I would assume that the forecast/alerts website contract would stay into place for the upcoming years but the funding needed for that contract increased due to Mexicali being added. If we can increase the grant amount for that effort to around ~\$140k that would be great. Also, the Mexicali PM2.5 study will be \$400k (for 2 years of monitoring) and we would like to see if this funding could continue as well. I have other ideas, but I am still writing those out. Amy will have them from Sylvia this or next week I believe.

Hello Lizzy,

We are working on our FY20 border funding. I was told by Amy Zimpfer to contact you regarding border activities for funding this year. Is monitoring funding pretty consistent year after year? If there are other activities I should consider during funding discussions, please let me know.

Thanks

Christine
